<https://www.linkedin.com/in/bmhung>

Senior Frontend Engineer with long experience building web applications, DApps, and complex UI systems. Specialized in React/Next.js ecosystems, modular architecture, and performance optimization. Passionate about crafting high-quality user experiences and maintainable frontend infrastructures.

## SKILLS

### Frontend

TypeScript, React, Next.js, Svelte  
TailwindCSS, Vanilla Extract, React Spring

### Architecture & Tooling

Webpack, Rollup, Monorepos, Tree-shaking  
Docker, GitHub Actions, CI/CD  
Progressive Web Apps (PWA), Service Workers

### Data & Backend Integration

GraphQL, MongoDB, REST APIs

### Visualization & Advanced UI

D3.js, Three.js, Complex UI animations

## WORK EXPERIENCES

### Coderpush - Lemonade.social

April 2022 - May 2024

Lead frontend engineer for a Web3 social DApp supporting NFT minting, auctioning, ticketing (fiat + token), and cross-chain identity integrations.

- Redesigned NFT minting & auction flows, improving UX consistency and reducing transaction errors.
- Integrated Stripe (fiat) and token-based payments (p2p).
- Implemented cross-chain NFT passport minting using Axelar.
- Integrated decentralized naming services (ENS, Lens, SpacelD, Unstoppable).
- Modularized and integrated Cinny (Matrix-based chat client).
- Integrated Ory for identity management.
- Designed and implemented dynamic theming system enabling white-label customization for brand partners.

## Tinypulse

August 2016 – April 2022

Sole frontend engineer assigned to enterprise client (30,000+ employees).  
Delivered large-scale survey platform handling 100+ question forms.  
Re-architected data visualization layer to support large datasets.  
Migrated multi-service frontend architecture into monorepo for performance and maintainability.  
Led migration from legacy stack to React ecosystem.

## Fram

August 2015 – August 2016

Joined the team of Consortio Fashion Group to reskin Halens.se and Cellbes.se - market leaders in Sweden fashion e-commerce. Brought modern look and features to the sites:

- Advanced menus & filters
- Responsive layout
- Rich components with KnockoutJS, improved user experience and page load speed with minimal trade-offs from traditional ASP implementation

## Devinition

June 2013 – June 2015

Developed PortalTalk - a role management system.  
Setup single-page web application with BackboneJS.  
Migrated legacy codebase away from jQuery.  
Built isolated components to be integrated with Sharepoint.  
Applied Microsoft Metro design principles to UI/UX.

## Axon Active

February 2012 – March 2013

Kickstart MyDataInNet - later named Infomio - an online Personal Information registry that ties with government records.  
Implemented early digital-to-print signature workflow integrated with government registry systems.  
Practiced and promoted Agile methodologies as a Scrum Master.  
Trained and coached among the team.  
Certified Scrum Master.

## EDUCATION & COURSES
